

DAUB PRO SET

16bit Tools for Adobe Photoshop

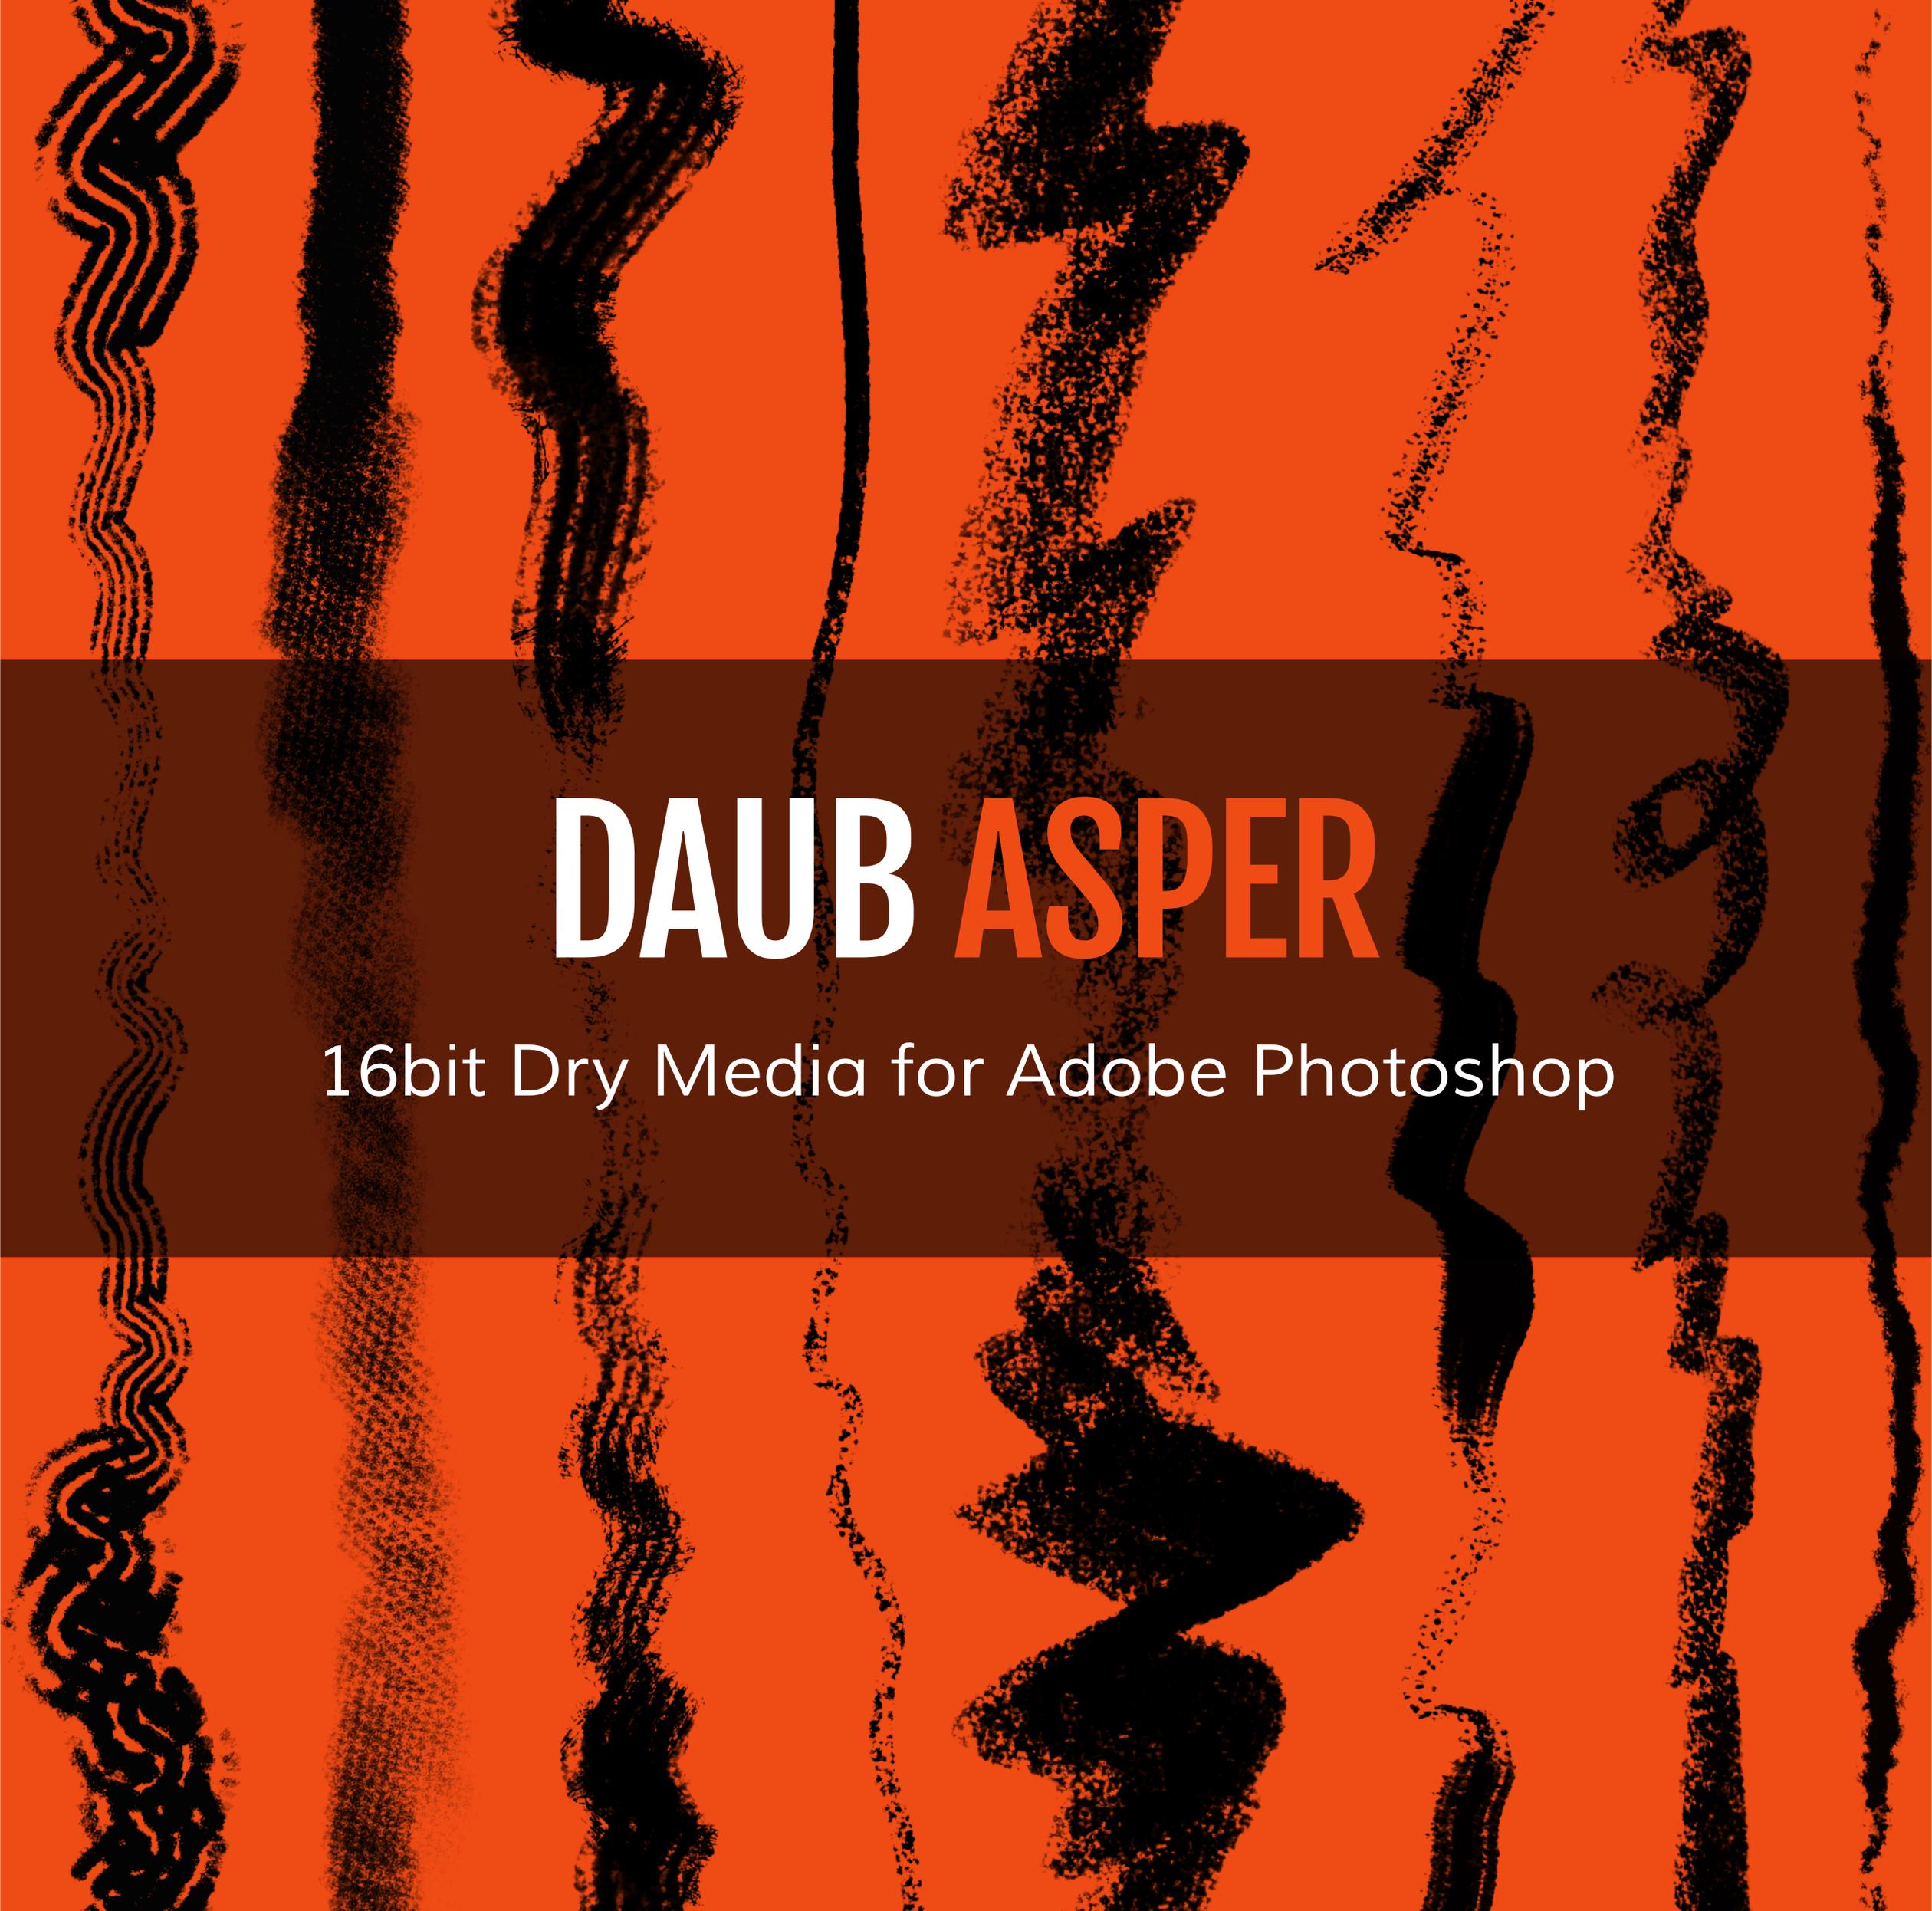

thank you.

DAUB ProSet for Photoshop is the result of years of study.
Every single bit has been designed with the deepest care and
passion, thanks the precious help of great artists too.

These tools want to pursue the best quality and responsiveness,
supporting the creative process but also being funny to use.

Happy painting!

A handwritten signature in black ink, consisting of the letters 'F' and 'L' in a stylized, cursive font.

The background features a vibrant orange color with several vertical, expressive black brushstrokes of varying thickness and texture. A horizontal band of a darker, muted orange color runs across the middle of the image, serving as a backdrop for the text.

These textures have been sampled using **real media** and "fractalised" in order to achieve a seamless tile.

No matter if used as paper overlay or brush texture: DAUB Papers always deliver a great result. The **16bit per channel sampling** offers better precision if you need further manipulations.

Thanks to the **16Mpx (4096x4096px)** resolution different scale factors offer different rendering, and make them suitable for professional projects.
